

Interests/activities/techniques

- Pelagic Ecology
- Zooplankton
- DVM
- Consequences of sea-ice reduction
- Ship-based acoustics + netting
- Moored echosounders / ADCP/ AZFP
- (Modelling)

Ambitions / future work

- A description of the operation of an ice-free Arctic
 - Extend from fjords to open ocean
- Deep Scattering Layers, including from Navy upward-looking sonar
- To get to UNIS!

Networks / partnerships

- This room
- David Thomas, Bangor + Finnish colleagues
- Jeremy Wilkinson, BAS
- Geraint Tarling, BAS
- Former PhDs / postdocs – THANKS for all your help
 - Clare Webster
 - Ananda Rabindranath
 - Margaret Wallace
- Laura Hobbs (SAMS) / Roland Proud (St Andrews)

Data

- Acoustic data from ships?
- Sediment trap samples

Collaboration

- DSLs
 - Global Map cf. Longhurst's biomes
- Roland Proud
- H2020 Mesopelagic work EU/Australia
